

MORTEN LARSEN

Born in 1959 and graduated as a sheet metal mechanic in 1980 at a ventilation company in Copenhagen.

Lived in Canada 1982-83, making bakery ovens for a Canadian company with German origins.

After moving back to Denmark, he sought new challenges and graduated as a machine technician in 1988.

He started working at the Danish toy manufacturer LEGO in 1989.

At LEGO he worked with approval of new injection tools, setting up and maintaining specifications, ad hoc trouble shooting and quality follow up - mainly with the manufacturing plant in Switzerland. Since 1999, he was mainly working with China, developing new products for LEGO with the major Chinese toy manufacturers.

Expatriated to Hong Kong with the family in 2003-04 to lead the development and manufacturing of LEGO Clikits, DUPLO and other products.

In 2006 he set up his own consultancy company with specialty of manufacturing in China.

In 2007 he met Glenn, and they started working together on the Cavius travel alarm. In 2008 they started developing the worlds smallest smoke alarm. In 2013 his China team became a full part of Cavius, and he was the Technical Director until he started in HOUE in 2022 with responsibility of plastic and China manufacturing.

He is now on a 4 day week to enjoy his own projects on the side.
